The Azuga Fleet Solution includes the following device and services:

- **Azuga GPS Datalogger**
  Device which comes in either OBDII, JBUS, or Hardwired configurations depending on the Carrier Customer vehicle requirements. Some configurations may require specific cables or connectors.

- **Azuga Fleet Solution**
  Base Azuga Fleet Mobile Solution for Drivers and Managers, and Reporting and Analytics against Posted Speed Limits.

- **Azuga Fleet Mobile Base Application** (Scores, Rewards, Driver Utilities)
  Includes several baseline features to engage mobile workers to participate in risk reduction and to make their jobs easier. Driver Scores and Rewards entice workers to improve their safe driving habits. In-app messaging makes it easier to communicate with the home office or peers. There are also several additional utilities like ETA management, navigation, vehicle health monitoring, and much more.

- **Distracted Driving Mobile Application**
  Premium feature add on to the mobile application that enables you to better manage distracted driving behavior. Capabilities differ by phone operating system. Policy monitoring is supported on Apple devices (you can view the phone usage) and policy enforcement is supported on Android devices (you are able to restrict phone usage in a highly configurable manner).

- **Driver Identification Mobile Application**
  Premium feature add on to the mobile application that enables you to positively identify the mobile worker driving each vehicle. The mobile application communicates directly with the Azuga device in the vehicle to identify the driver without the driver needing to take any action other than to be logged on to the application.

- **Preventative Maintenance Application**
  Powerful utility that enables you to proactively manage your maintenance events through miles, engine hours, or time-based metrics. In addition, maintenance records and receipts can be uploaded to the system to support a comprehensive maintenance program.

Add-On Features

Roadside Assistance

2.50/vehicle p/month

Delivered in partnership with ARS, this program supports drivers with disabled vehicle events with services like towing, battery jump, tire change and more.

Driver Identification Beacon Card

$1.50/card p/month – OR – $15 p/card if purchased

This solution enables customers to positively identify the mobile worker driving each vehicle through the deployment of a credit card sized plastic card. The card identifies the driver by communicating a driver-specific code to the Azuga device in the vehicle via Bluetooth. No action is required by the driver other than to have the card present, typically in their wallet or employee badge holder.
